

UPDATE: Preparing for New ACE Deployment

by Danielle Leonard - Wednesday, November 22, 2017

Updated: Customs will be undertaking an ACE deployment on January 6. To avoid the possibility of late payments, Mohawk will authorize two days' worth of duty payments, ahead of time, for as many shipments as possible. Doing this will help avoid any service disruptions due to failures resulting from this update.

We are actively working with our software provider and will be monitoring ACE closely during this new deployment in hopes of providing a smooth transition.

Customs is keeping an eye out for a possible funding lapse, due to congressional budget issues, that may impact this deployment. We will continue to provide updates as they become available.

Note: *This deployment will not affect customers that are enrolled in Periodic Monthly Statements.*
