

MGTA Launches Partnership with New England's OCEANAIR

Thursday, February 19, 2015

Mohawk Global Trade Advisors (MGTA) is now partnering with local forwarder OCEANAIR to bring a different kind of offering to international companies in the New England area: Trade consulting independent from brokerage and forwarding.

Unlike many other local trade consulting firms, MGTA will operate independently from its local brokerage and forwarding partner, OCEANAIR. This allows for greater transparency in MGTA's consulting operations, negating any possible conflict of interest.

Along with unprecedented access to some of the country's foremost thought leaders on trade regulations, MGTA will provide area companies with import and export audits, compliance manuals, and C-TPAT services.

MGTA's team members are some of the most sought after speakers for industry conferences, trade groups, and government agencies, including the U.S. Department of Commerce, Canadian Consulate, and National Customs Brokers and Forwarders Association of America. Staff credentials include Certified U.S. Export Compliance Officer, Certified Export Specialist, Certified ITAR Professional, licensed U.S. Customs Broker, and Certified Customs Specialist.

Founded in 1983, OCEANAIR provides Customs brokerage and freight forwarding services to clients throughout New England.
